

Your Business' Security is Bushel's Top Priority

Bushel Wallet enables businesses to securely transact with each other throughout the agriculture industry with a click of a button. Whether you are requesting payments from your customers or making payments to a business partner, each side of the secure payment transaction requires a Verified Bushel Wallet Account.

What is a Verified Bushel Wallet Account?

In order to establish a Bushel Wallet Account, your business, whether a Sole Proprietorship or an Entity (such as a Corporation, LLC or Partnership), must be verified with our partnered financial institution. Bushel has streamlined this verification process through our digital onboarding process which is identical to the paper onboarding process that is required at all financial institutions since the 2001 US Patriot Act, in order to open any financial account in the US.

Why Have a Verified Bushel Wallet Account if I Only Want to Pay Others?

Your business is setting up a Bushel Wallet Account because the partners with which you do business believe Bushel Wallet is the safe, secure and dependable way to transact in the high-dollar agriculture industry. Verifying your business establishes high confidence when linking external checking, savings and operating lines of credit to your business Bushel Wallet Account for the purpose of making secure digital payments throughout the industry.

How do I Establish a Verified Bushel Wallet Account?

Simple, Bushel has digitized the enrollment! No more in-person meetings at your financial institution, filling out paper forms and photocopying personal identification. While a Verified Bushel Wallet Account is established with the same required business information, it should take you just a few minutes during Bushel Wallet onboarding to complete the digital forms.

Who Can Create a Bushel Wallet Account?

Any person in the organization who generally has authorization to set up a financial account on behalf of the organization. With a Sole Proprietorship business this individual may be obvious; however, entities such as Partnerships, Corporations or LLCs are typically established by the organization's Controller, Chief Financial Officer or other financial manager who would otherwise establish a new account with a financial institution.

What Data Does a Verified Bushel Wallet Account Need?

This is the same data your business would share if you were establishing a new checking account at your local bank:

- For Sole Proprietorships this includes personal verifiable information such as Name, Address, Social Security Number and Date of Birth
- For Entities this includes your Business Name, EIN and personal information of an individual within the organization who has the authority to manage finances on behalf of the organization, such as a business owner, a Controller, CFO or other authorized principal.
 - Additionally, as required by law, all Beneficial Owners must also be verified. Some organizations may not have any Beneficial Owners while others may. A Beneficial Owner is any person who owns 25% or more of the organization in which the Bushel Wallet Account is being established.

Why Am I Seeing No Account Found?

To ensure that your invoices are correctly displayed in your Bushel Wallet account, the phone number used to open the wallet must match the one on record with American AGCO. If there's a discrepancy and no invoices are showing, you can easily resolve this by calling or sending an email to American AGCO and requesting that your Bushel Wallet account phone number be added to American AGCO's records. While awaiting the update, you can still proceed to open your Bushel Wallet account. Invoices will be displayed correctly once the update is finalized.
